Fullstack Developer

JavaScript | React | Node.js | REST APIs
Innovative fullstack developer with 1+ years of experience building scalable web applications. Passionate about creating seamless user experiences through clean code and modern frameworks. Excited to collaborate with Silicon Valley's fastest-growing companies through Micro1.

Technical Skills

Frontend: React, Angular, JavaScript (ES6+), HTML5, CSS3
Backend: Node.js, Express, RESTful API Development
Databases: MongoDB, PostgreSQL
Tools: Git, Webpack, Docker, AWS
Methodologies: Agile, CI/CD, TDD

Professional Experience

Junior Software Developer | *First Aiders* | *Remote* | *2022-2023

- Contributed to SaaS product used by hundreds of users
- Built Node.js microservices handling 50K+ daily API requests with 99.9% uptime
- Led migration from Angular to React, improving developer productivity by 30%
- Implemented JWT authentication across 5 client projects

Software Engineer Intern | *Digital Solutions Co.* | Summer 2021

- Created responsive UIs using React/Redux for SaaS platform with 25K+ users
- Reduced bundle size by 35% through Webpack optimization
- Integrated 3rd-party APIs (Stripe, Google Maps) with custom React hooks

---

Projects

E-Commerce Dashboard | *React + Node.js*

- Built admin portal with real-time analytics using WebSockets
- Deployed on AWS with automated CI/CD pipeline

AI Content Platform | *Angular + NestJS*

- Developed CMS with rich text editor and collaborative features
- Scaled backend to handle 1M+ monthly requests

Education

Computer Science Degree | *University of Toronto* | *2020*

Why Micro1?

Proven remote collaboration experience
Passion for staying ahead of tech trends (currently learning GraphQL)
Track record of delivering production-ready apps
